# View Redesign & Development

## Task1

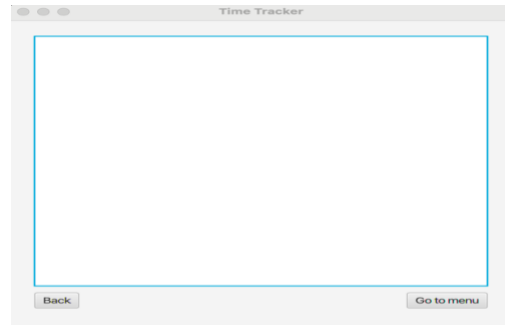

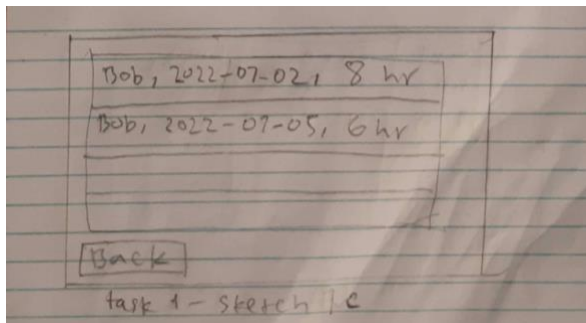

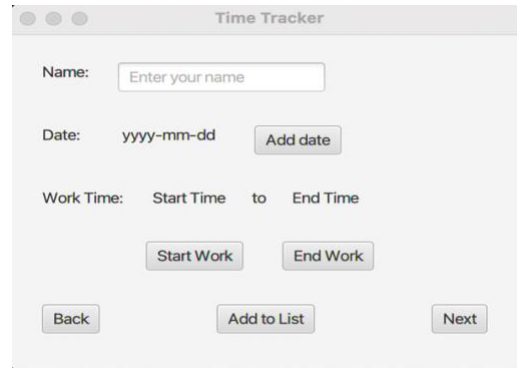

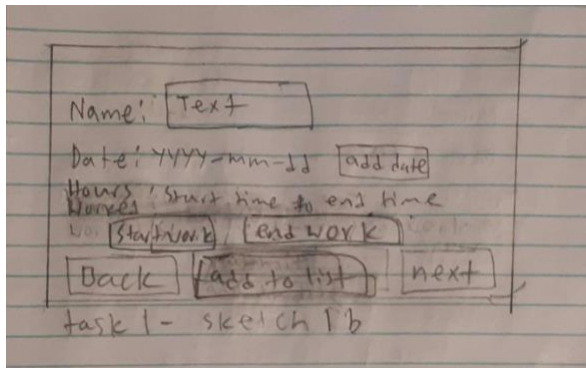

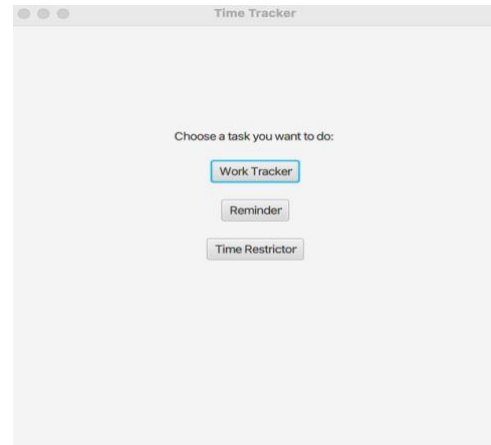

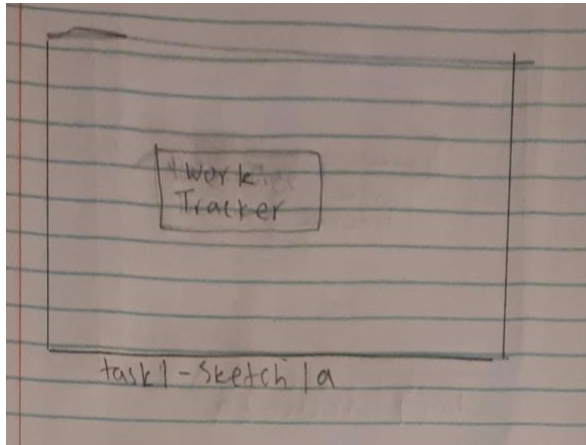

For task1 I only changed the menu page to have all three task categories also on the third page of it I added a 'Go to menu' button to the user will not have to press back twice to get to menu selection.

Task2

Task 2 – Sketch 3 a

**Time Tracker**

Assignment/Project Name:     Enter assignment/project name

Due Date:     yyyy-mm-dd
(in yyyy-mm-dd format)

Due Time:     hr : min
(24 hour format)

Go to menu          Summit

For task2 same as task1 combined the three tasks to make that menu page. Also just changed the name 'back' button to 'Go menu button' because it only has one page and back will basically take it back to menu page. Also, instead of having reminder message appear and if reminder is successfully set or failed message appear to the side, it will happen at the bottom.

Task3

Time Tracker

Choose a task you want to do:

Work Tracker

Reminder

Time Restrictor

Time Tracker

Set your Time:
(in minutes)

min

Go to menu          Submit

For task3 same as task1 and task2 combined the three tasks to make that menu page. Also just changed the name 'back' button to 'Go menu button' because it also has one page and back will also take it back to menu page. Also, instead of having time up message appear and if time is set successfully or failed message appear to the side it will happen at the bottom. Another thing I changed is insured of setting timer in hours and minutes I clanged it to just minutes.
